

IN THE CLAIMS

1. (original): A metal chelate of Formula (1) or salt thereof:

Formula (1)

wherein:

R¹ and R² are each independently H or an organic group;

M is a metal;

p is 1 to 4;

Y is an optionally substituted heterocyclic ring with a nitrogen ortho to the azo bridge;

G is a substituent; and

n is 0 to 5.

2. (original): A metal chelate according to claim 1 wherein M is selected from nickel, cobalt, copper, zinc and chromium.

3. (original): A metal chelate according to either claim 1 or claim 2 wherein M is nickel.

4. (currently amended): A metal chelate according to ~~any one of the preceding~~ claims claim 1 or claim 2 wherein p is 2.

5. (currently amended): A metal chelate according to ~~any one of the preceding~~ claims claim 1 or claim 2 wherein one of R¹ and R² is H and the other is optionally substituted phenyl or optionally substituted C₁₋₄-alkyl.

6. (currently amended): A metal chelate according to ~~any one of claims 1 to 4~~ claim 1 or claim 2 wherein R¹ and R² are both methyl.
7. (currently amended): A metal chelate according to ~~any one of the preceding claims claim 1 or claim 2~~ wherein Y is a 5 or 6 membered ring.
8. (currently amended): A composition comprising a metal chelate of Formula (1) as described in ~~any one of claims 1 to 7~~ claim 1 and a liquid medium.
9. (original): A composition according to claim 8 wherein the liquid medium is a mixture of water and organic solvent.
10. (currently amended): A composition according to ~~either claim 8 or claim 9~~ which is an ink suitable for use in an ink-jet printer.
11. (original): A process for forming an image on a substrate comprising applying an ink according to claim 10 thereto by means of an ink-jet printer.
12. (currently amended): A material printed with a composition as described in ~~any one of claims 8 to 10, a metal chelate as described in any one of claims 1 to 7 or by means of a process as described in claim 11~~ claim 8.
13. (original): An ink-jet printer cartridge comprising a chamber and an ink wherein the ink is in the chamber and the ink is as defined in claim 10 of the present invention.
14. (new): A material printed with a metal chelate as described in claim 1.
